PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 18+ years of experience building, maintaining and modernizing production web applications. My current focus is React, TypeScript, software architecture and applied AI for business workflows. At 404 Crafters I build administrative platforms, B2B portals, dashboards and reporting systems using Clean Architecture, CQRS and the Presenter Pattern. Alongside my full stack work, I develop LLM integrations and workflow automation: an editorial pipeline that turns emailed press releases into WordPress drafts for human review, and a WhatsApp assistant built on OpenAI function calling. Extensive background in PHP, WordPress, Laravel, Node.js, REST and GraphQL APIs, relational databases, Docker and CI/CD. Open to remote opportunities building useful, reliable AI-powered applications.

TECHNICAL SKILLS

Top Skills	**TypeScript, React, WordPress, Software Architecture, Large Language Models (LLM)**
Languages	TypeScript, JavaScript, PHP, SQL, HTML, CSS
Frontend	React, Vite, Material UI, MUI X DataGrid, Apollo Client, React Router, React Query, React Hook Form, Zod, i18next
Backend / Data	Node.js, NestJS, Express, Laravel, REST APIs, GraphQL (Apollo, subscriptions), PostgreSQL, MySQL, MongoDB, Mongoose
AI	Generative AI, LLMs, OpenAI API, function calling, Google Gemini, Google Apps Script, Gmail/Drive/Sheets APIs, Twilio WhatsApp API, Zapier, human-in-the-loop workflows, AI-assisted development (Claude Code, Codex)
Architecture	Software architecture, software design, Clean Architecture, Hexagonal Architecture, CQRS, Presenter Pattern, design patterns, OOP
WordPress	Plugin development, REST API, WP-Cron, custom tables, ACF, Custom Post Types, web application security (nonces, reCAPTCHA v3, rate limiting), Mailchimp, YouTube Data API
DevOps	Docker, Docker Compose, GitHub Actions, GitLab CI/CD, AWS, Vercel, NGINX, PM2, Git
Practices	Scrum, team leadership, problem solving, client-facing communication

PROFESSIONAL STRENGTHS

Leadership & Ownership
Led a five-person development team and worked as Scrum Master. Take ownership of delivery, quality and technical outcomes.

Client Communication
Work directly with clients and international teams in English to clarify requirements, discuss technical decisions and present solutions.

Deliberate Technical Decisions
Validate ideas with low-cost POCs, document architecture decisions and favor maintainable code over quick fixes.

Modernizing Existing Systems
Deep PHP and WordPress experience plus a practical understanding of production constraints to connect new capabilities with existing systems.

AI-Assisted Development
Use AI coding tools such as Claude Code and Codex alongside explicit project rules, architecture documentation and tests.

Autonomy & Teamwork
Proactive and reliable without close supervision, while keeping a positive and collaborative team dynamic.

PROFESSIONAL EXPERIENCE

404 Crafters - Senior Full Stack Engineer

Nov 2023 - Present

Full-time · Remote · proyecto404.com

- Develop and maintain production web applications for international clients, with a focus on React, TypeScript and complex business workflows.
- Configure AWS environments and CI/CD workflows with GitHub Actions, Docker and Docker Compose to support application delivery and deployment.
- Collaborate directly with clients and teammates in English to clarify requirements, discuss technical decisions and deliver maintainable solutions.

- **Portal Expensas:** condominium management platform covering settlements, payroll, payments, units, suppliers and documents. Interfaces and business workflows with React, TypeScript, Material UI and Apollo GraphQL, applying Clean Architecture, CQRS and the Presenter Pattern.

- **Portal de Aliados - Fanki:** B2B portal for event operations, sales, payments, attendance and business metrics. Dashboards, exportable reports and role-based interfaces with React, TypeScript and Material UI.

- **News Kiosk:** frontend and backend work on a news analysis platform for a US client: search interfaces, dashboards, saved searches, PDF viewing and email sharing with React, React Query, Node.js, Express and MongoDB.

Insider Latam - Full Stack & AI Automation Developer

Oct 2024 - Present

Freelance · Remote · insiderlatam.com

- Develop and maintain insiderlatam.com, a Latin American news portal, supporting editorial and marketing workflows.
- Build an AI editorial pipeline that transforms press releases received by email into WordPress drafts for human review, using Google Apps Script and the Gemini API, while keeping editors in control of publication.
- Develop custom WordPress plugins and integrations: a responsive newsletter builder, editorial filters, a YouTube Shorts carousel, and sports and event coverage widgets.
- Extend WordPress with PHP, JavaScript, external APIs and custom admin tools; maintain and modernize the site through PHP upgrades, plugin updates, troubleshooting and performance improvements.

Mundialito Senior - Full Stack & AI Developer

Mar 2026 - Jul 2026

Freelance · Remote

- Developed a WhatsApp AI assistant for a client running amateur football tournaments, so participants and organizers can ask about fixtures, results, standings, teams and rules in natural language.
- Backend with NestJS, TypeScript, PostgreSQL and Twilio, integrating OpenAI function calling with seven tools, the CopaFacil API and a Google Docs FAQ.
- Request signature validation, retries, API fallbacks and response checks against tool results to reduce unsupported answers; admin tools and a testing environment using the same processing pipeline.
- Demonstrated to the client with positive feedback; launch is pending on the client's side.

IntermarketFlow - WordPress Plugin Developer

Aug 2025 - Present

Freelance · Remote · intermarketflow.com

- Develop and maintain SEO Content Locker, a custom WordPress plugin for premium content access and lead capture on a financial markets analysis website.
- Email-based access with trial expiration and session restoration; layered anti-bot protection with reCAPTCHA v3 and rate limiting by IP, form and email.
- Mailchimp integration with dynamic tags and lead-source tracking; admin tools for lead management, CSV exports and daily WP-Cron reports.
- Refactored procedural code into modular PHP services, repositories and an event-based notification system.

Career Break - Professional Growth

Mar 2023 - Oct 2023

Tandil, Argentina

- Planned career break focused on expanding my full stack skills, with an emphasis on React, TypeScript, Node.js and React Native.
- Self-directed learning in React, Node.js and React Native, alongside Laravel 10 (Livewire, Eloquent, Sanctum) and WordPress/WooCommerce customization using hooks and filters.
- Collaborated with a small team on CUTI, a mobile app for voice calls and recordings between companies and investors (React Native, Node.js, TypeScript, REST API, Agora and Amazon S3). Contributed the login and registration flows.
- Started a structured English program in April 2023, with two classes per week, and completed it in 2026.

Doppler - Senior WordPress Developer / Scrum Master

Apr 2013 - Feb 2023

Full-time

- Technical owner of Doppler's corporate WordPress websites for nearly ten years, supporting marketing initiatives, business operations and third-party integrations.
- Developed and maintained fromdoppler.com, doppleracademy.com and goemms.com, building custom functionality with PHP, JavaScript and MySQL.
- Integrated external services such as Twitter, Zoho and GoToWebinar, and supported five editions of GOEMMS, a major Latin American marketing event, with live-streaming integrations and cached Twitter API content.
- Managed deployments, NGINX configuration, hosting migrations, troubleshooting and performance; also contributed to Drupal and Laravel projects and performed Scrum Master duties.

Intercomgi - Scrum Master / Frontend Developer

Apr 2012 - Apr 2013

- Scrum Master and frontend developer for a web application built with Backbone.js.

Avatar - Project Lead / Scrum Master / Team Lead / Senior PHP Developer

Mar 2008 - Jun 2012

- Led the development of PHP websites for major Latin American clients, including Greenpeace Latin America, Mastercard, Banco Nacion Argentina, Fashion TV Project Runway, Disney Highway Zapping Zone, a Coca-Cola extranet, Sherwin Williams and Telcosur.
- Coordinated the team and owned the quality of delivered products.

SELECTED PROJECTS

Portal Expensas

Condominium management platform for administrators: settlements, payroll, payments, units, suppliers and documents. React, TypeScript, Material UI and Apollo GraphQL, with Clean Architecture, CQRS and the Presenter Pattern.

Insider Automation - Editorial AI Pipeline

Turns press releases received by email into WordPress drafts for human review. Google Apps Script and the Gemini API process content and editorial instructions; editors stay in control of every publication.

WhatsApp AI Tournament Assistant

Answers questions about amateur football tournaments in natural language. NestJS, PostgreSQL, Twilio and OpenAI function calling with seven tools over external data, with response checks to reduce unsupported answers. Launch pending on the client's side.

SEO Content Locker

WordPress plugin for premium content access and lead capture: trial access by email, reCAPTCHA v3 and rate limiting, Mailchimp lead tracking, CSV exports and daily WP-Cron reports, built on modular PHP services.
