Frameworks	React, React Native, Expo, Node.js, Express, NestJS, Laravel, WordPress
Frontend Libraries	Material UI, MUI X DataGrid, React Router, React Query, React Hook Form, Zod, Yup, i18next, ApexCharts, Emotion
APIs / Data	REST APIs, GraphQL, Apollo GraphQL, Axios, JWT, Socket.IO, MongoDB, Mongoose, MySQL, PostgreSQL
Architecture	Clean Architecture, Hexagonal Architecture, CQRS, Presenter Pattern, use cases, repositories, services, mappers, SOLID principles, clean code
WordPress	Plugin development, hooks, shortcodes, AJAX, nonces, WP_List_Table, Custom Post Types, ACF, custom database tables, CSV/XLSX export, PHP 8 migrations
DevOps / Tools	Docker, Docker Compose, GitLab CI/CD, GitHub Actions, Vercel, AWS, AWS S3, PM2, NGINX, Winston/CloudWatch logging, ESLint, Prettier, Jest
Mobile/AI	Agora RTC, React Navigation, AsyncStorage, React Native WebView, LLM integrations, multimodal AI, Gemini, OpenAI-compatible APIs, Groq, Zapier, Gmail, structured JSON, human-in-the-loop workflows, Twilio WhatsApp API, Mailchimp API, LinkedIn OAuth, Google reCAPTCHA

PROFESSIONAL STRENGTHS

Leadership & Ownership
Experienced leading teams, coordinating delivery, removing blockers and taking responsibility for product quality and technical outcomes.

Communication & Client Facing
Comfortable explaining technical concepts, aligning with stakeholders, presenting demos and collaborating with clients and cross-functional teams.

Problem Solving
Pragmatic and adaptable approach to analyze problems, propose alternatives and balance technical quality, time and business needs.

Autonomy & Teamwork
Proactive, reliable and able to work without close supervision while keeping a positive, collaborative and supportive team dynamic.

PROFESSIONAL EXPERIENCE

404 Crafters - Senior Frontend / Full Stack Engineer
Nov 2023 - Present

proyecto404.com

- Build and maintain modern web applications using React, TypeScript, Material UI and Node.js.
- Define and implement UI structures for administrative dashboards, using Material UI dashboard patterns as a design and interaction reference.
- Work on layered frontend architectures separating presentation, domain, use cases, infrastructure and data access.
- Integrate REST and GraphQL APIs, authentication flows, protected routes, dashboards, reports and complex business workflows.
- Collaborate with international clients, including English-speaking environments, product discussions and demo presentations.

- **Portal Expensas Admins (Nov 2025 - Present):** administrative platform for condominium and expense management. UI definition and development of modules for administrations, buildings, units, employees, payments, settlements, documents and internal tickets. React, TypeScript, Material UI, MUI X DataGrid, Apollo GraphQL, Clean Architecture/CQRS.

- **Portal de Aliados (Jan 2025 - Nov 2025):** B2B portal for events, sales, payments, attendance, subscriptions, merchants and business metrics. UI definition, dashboards, exportable reports, role-based access, organization restrictions and feature flags. React, TypeScript, Vite, Material UI, MUI X, ApexCharts, Node/Express, Docker, GitLab CI/CD, Vercel.

- **News Kiosk (Nov 2023 - Nov 2024):** full stack news analysis and management platform for an English-speaking client. UI planning, advanced search, dashboards, article details, saved searches, PDF reading, email sharing and REST APIs. React, TypeScript, React Query, Node.js, Express, MongoDB, Mongoose, JWT, Docker, PM2.

Freelance / IntermarketFlow - WordPress Plugin Developer
2024 - Present

intermarketflow.com

- Develop and maintain WordPress features for a financial markets analysis website focused on intermarket, technical and macroeconomic analysis.
- Built SEO Content Locker, a custom WordPress plugin for premium content access, lead capture and monetization.
- Implemented email-based access validation, trial expiration, IP abuse control, Google reCAPTCHA, Mailchimp API v3, dynamic tags, admin lead management, CSV export, logs and email notifications.

Insider Latam / Insider - WordPress Developer
2023 - Present

insiderlatam.com

- Maintain a WordPress news portal and migrated the site to PHP 8.
- Develop custom WordPress plugins for editorial and marketing workflows, including newsletters, LinkedIn publishing, configurable popups and advanced backend filters.
- Built plugins using Custom Post Types, ACF local fields, responsive HTML email rendering, OAuth, featured images, PhpSpreadsheet, Select2, secure exports and admin indicators.
- **Insider Editorial Automation Workflow (In progress):** designed an AI-assisted editorial workflow using Gmail, Zapier and Gemini to analyze emails and available attachments, prepare structured post drafts, suggest featured images and keep human review before publication.

Freelance / Professional Growth Period - Mobile and React Developer
Feb 2023 - Nov 2023

- Focused on React, TypeScript, React Native, Laravel, Hexagonal Architecture and Clean Architecture.
- Worked on CUTI, a mobile application for corporate conference calls between companies and investors.
- Implemented authentication, user profiles, call creation/search, live audio using Agora RTC, Socket.IO realtime synchronization, moderation, PDF viewing, local session persistence and recording playback.

Doppler - Senior WordPress Developer / Frontend Developer / Scrum Master
Apr 2013 - Feb 2023

- Led maintenance and evolution of 5 institutional WordPress websites for marketing, internal requests and integrations.
- Worked as technical reference and collaborated with company teams to research, prioritize and design new functionality.
- Contributed to GOEMMS, a major marketing event in Latin America, including high-traffic website support, live streaming flows and Twitter API integration with caching.
- Worked on hosting maintenance, migrations, performance improvements, external API integrations and technical updates.

Intercomgi - Scrum Master / Frontend Developer

Apr 2012 - Apr 2013

- Worked as Scrum Master and frontend developer on a web application using Backbone.js, JavaScript, MySQL and web technologies.

Avatar - Project Lead / Scrum Master / Senior PHP Developer

Mar 2008 - Jun 2012

- Led and developed PHP websites for major clients in Latin America, including Greenpeace Latin America, Mastercard, Banco Nacion Argentina, Fashion TV, Disney, Coca-Cola, Sherwin Williams and Telcosur.
- Coordinated development teams and ensured delivery quality.

SELECTED PROJECTS

Insider Editorial Automation Workflow

In-progress editorial workflow using Gmail, Zapier and Gemini to transform emails and available attachments into structured post drafts, with multimodal image analysis, editorial rules and human review before publication.

WhatsApp AI Tournament Assistant

Conversational WhatsApp assistant for amateur football tournaments using NestJS, strict TypeScript, Twilio, OpenAI, PostgreSQL, Google Docs and CopaFacil API. Manages multiple tournaments, routes queries through seven strict function-calling tools, combines FAQ content with live data and applies fallback logic plus a hallucination guard.

POC Cartas - Spanish Deck Mobile App

React Native and Expo proof of concept for interactive manipulation of a Spanish card deck, with drag and drop, card flipping, visual customization and hexagonal architecture.

EDUCATION

Software Engineer Degree - UNICEN
Graduated, 2015

LANGUAGES

Spanish: Native
English: Intermediate / Upper-Intermediate in progress. Able to work with technical documentation and written technical communication.
