PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 18+ years of experience building, maintaining and modernizing production web applications. Focused on React and TypeScript for complex administrative platforms and B2B portals, using Clean Architecture, CQRS and Presenter Pattern, with GraphQL/REST integrations and Docker-based delivery on GitHub Actions and AWS. In the last year, designed and shipped applied AI systems: an editorial automation pipeline on Google Apps Script and Gemini API validated with real client data, and a WhatsApp assistant with strict function calling and hallucination guardrails. Strong background in PHP and WordPress plugin development, legacy modernization and AI-assisted development with coding agents. Recognized for technical ownership, clear communication and a collaborative mindset with teams and clients.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, PHP, SQL, HTML, CSS
Frontend	React, Vite, Material UI, MUI X DataGrid, Apollo Client, React Router, React Query, React Hook Form, Zod, i18next
Backend / Data	Node.js, NestJS, Express, REST APIs, GraphQL (Apollo, subscriptions over WebSocket), PostgreSQL, MongoDB, MySQL, JWT
AI / Automation	Gemini API, OpenAI API, function calling, structured outputs, multimodal analysis, hallucination guardrails, human-in-the-loop, Google Apps Script, Gmail/Drive/Docs/Sheets APIs, Twilio WhatsApp API, Zapier, AI-assisted development (Claude Code, Codex)
Architecture	Clean Architecture, Hexagonal Architecture, CQRS, Presenter Pattern, use cases, repositories, mappers, ADRs, SOLID
WordPress	Plugin development, REST API, WP-Cron, custom tables, ACF, Custom Post Types, nonces/capabilities, rate limiting, PhpSpreadsheet, Mailchimp, LinkedIn OAuth, YouTube Data API, PHP 8 migrations
DevOps	Docker, GitHub Actions, GitLab CI/CD, GitHub Container Registry, AWS (Lightsail, S3), Vercel, Traefik, NGINX, PM2
Mobile	React Native, Expo

PROFESSIONAL STRENGTHS

Leadership & Ownership
Experienced leading teams, coordinating delivery, removing blockers and taking responsibility for product quality and technical outcomes.

Communication & Client Facing
Comfortable explaining technical concepts, aligning with stakeholders, presenting demos and writing client-facing documentation.

Problem Solving
Pragmatic approach: validate ideas with low-cost POCs, then decide explicitly when to re-architect, balancing quality, time and business needs.

Autonomy & Teamwork
Proactive, reliable and able to work without close supervision while keeping a positive, collaborative and supportive team dynamic.

PROFESSIONAL EXPERIENCE

404 Crafters - Senior Frontend / Full Stack Engineer

Nov 2023 - Present

proyecto404.com

- Build and maintain production React + TypeScript applications for international clients, from UI definition to deployment.
- Apply layered architectures (Clean Architecture, CQRS, Presenter Pattern) separating presentation, domain, use cases and infrastructure.
- Integrate REST and GraphQL APIs, realtime subscriptions, authentication, role-based access, dashboards and reports.
- Collaborate in English-speaking environments: product discussions, pull requests and demo presentations.

- **Portal Expensas Admins (May 2025 - Present):** administrative platform for condominium management: expenses, settlements, payroll, payments, suppliers, documents and internal support tickets. Defined the base UI and am the second-largest contributor (1,400+ commits), focused on payroll, units, receipts and a realtime ticketing system over GraphQL subscriptions with reconnect and resync. Built the delivery pipeline: GitHub Actions, Docker images on GHCR, AWS Lightsail with Traefik, health checks and tag-based hotfixes. React, TypeScript, Vite, Material UI, MUI X DataGrid, Apollo GraphQL.

- **Portal de Aliados (Aug 2024 - Apr 2025):** B2B portal for events, sales, payments, attendance, subscriptions and business metrics. Main contributor to the first version: UI definition, dashboards, exportable reports, role-based access, organization restrictions and feature flags. React, TypeScript, Vite, MUI X, ApexCharts, Node/Express, Docker, GitLab CI/CD, Vercel.

- **News Kiosk (Nov 2023 - Mar 2025):** full stack news analysis platform for a US client. Main contributor: advanced search, dashboards, saved searches, PDF reading, email sharing and REST APIs. React, TypeScript, React Query, Node.js, Express, MongoDB, JWT, Docker, GitLab CI/CD.

Insider Latam - WordPress & AI Automation Developer

2023 - Present

insiderlatam.com

- **Insider Automation (2026):** designed and built an AI editorial pipeline that turns press releases received by email, with attachments, linked Google Docs, images and videos, into WordPress drafts for human review. Validated the idea with a Zapier + Gemini POC, then re-architected it on Google Apps Script and Gemini API with resumable batch orchestration, per-attempt idempotency, prompts versioned in Google Sheets, SHA-256-verified featured images, house-style validation, 71 local test suites and a WordPress control plugin. On a real client sample: 20/20 cases without errors (16 OK, 4 with editorial warnings).
- Build and maintain custom plugins for editorial and marketing workflows: responsive email newsletters, LinkedIn company-page publishing (OAuth), editorial filters with Excel export, a YouTube shorts carousel (YouTube Data API v3), a World Cup 2026 match widget (API-Football) and a Cannes Lions medal tracker with Excel import.
- Maintain the news portal: PHP 8 migration, plugin updates, error-log cleanup and performance fixes.

Mundialito Senior - AI / Full Stack Developer

Mar 2026 - Jul 2026

- Built a WhatsApp AI assistant so tournament participants and organizers can query fixtures, results, standings, teams and rules in natural language, with no app or login.
- NestJS and strict TypeScript backend with a two-step LLM pipeline (OpenAI) routing through seven strict function-calling tools over PostgreSQL, Google Docs FAQ content and the CopaFacil API.
- Reliability: Twilio HMAC-SHA1 signature validation, retry/fallback for external APIs, a hallucination guard that checks answers against tool results, and an in-process testing platform that runs the production pipeline.

IntermarketFlow - WordPress Plugin Developer (Freelance)

2024 - Present

intermarketflow.com

- Built and evolve SEO Content Locker, a plugin for premium content access and lead capture on a financial markets analysis site.
- Email-based access with trial expiration, layered anti-bot protection (reCAPTCHA v3, rate limiting by IP, form and email), Mailchimp sync with source tags, admin lead management, CSV export and a daily WP-Cron lead report.
- Refactored the plugin from procedural helpers to namespaced services, repositories and an event-based notifier.

Freelance / Professional Growth Period - Mobile and React Developer
Feb 2023 - Nov 2023

- Transitioned to React, TypeScript, React Native, Hexagonal Architecture and Clean Architecture.
- Worked on CUTI, a mobile app for corporate conference calls with live audio (Agora RTC), Socket.IO realtime sync, moderation, PDF viewing and recordings.

Doppler - Senior WordPress Developer / Frontend Developer / Scrum Master
Apr 2013 - Feb 2023

- Led maintenance and evolution of 5 institutional WordPress websites for marketing, internal requests and integrations.
- Worked as technical reference and collaborated with company teams to research, prioritize and design new functionality.
- Contributed to GOEMMS, a major marketing event in Latin America: high-traffic website support, live streaming flows and Twitter API integration with caching.
- Handled hosting maintenance, migrations, performance improvements and external API integrations.

Intercomgi - Scrum Master / Frontend Developer
Apr 2012 - Apr 2013

- Scrum Master and frontend developer for a JavaScript single-page web application.

Avatar - Project Lead / Scrum Master / Senior PHP Developer
Mar 2008 - Jun 2012

- Led and developed PHP websites for major clients in Latin America, including Greenpeace Latin America, Mastercard, Banco Nacion Argentina, Fashion TV, Disney, Coca-Cola, Sherwin Williams and Telcosur.
- Coordinated development teams and ensured delivery quality.

SELECTED PROJECTS

Insider Automation - Editorial AI Pipeline
Gmail, Drive and Docs sources processed by Google Apps Script and Gemini API into WordPress drafts. Resumable batches that work around platform execution limits, idempotent attempts, prompts editable without deploys, multi-source featured-image selection and mandatory human review. Built on documented ADRs and a local test suite with Google service doubles.

WhatsApp AI Tournament Assistant
Conversational assistant for amateur football tournaments using NestJS, Twilio, OpenAI, PostgreSQL, Google Docs and CopaFacil API. Multi-tournament sessions, seven strict function-calling tools, live data with fallback, and a hallucination guard that degrades to a safe answer when a response is not grounded.

EDUCATION

Software Engineer Degree - UNICEN
Graduated, 2015

LANGUAGES

Spanish: Native
English: Upper-Intermediate in progress. Able to work with technical documentation and collaborate with English-speaking teams.
